

For my project, I created 3 magnets that represent the last 3 years of my life. I was born and grew up in Istanbul, Turkey. I came to the US about 6 years ago. First time I left home for coming to US , I thought that I was going to feel free to travel everywhere.. There was also so much to see and explore in US, too. I travelled as much as I could in the first few 3 years.. However, the US has become my second home and now I have two homes. This situation might sound nice, but there is a huge distance between US and Turkey. So this doesn't allow me to travel anywhere else than my homes.

I also made these 3D printed objects like souvenir magnets, because recently I noticed that I have a lot of souvenirs like magnets, key chains, mugs and etc. from the everywhere that I have travelled to, but I don't have anything from the country that I had spent 80% of my life. And I don't think I will ever have, because it's my home and when I go there, I don't consider it as traveling.. Same thing applies to US as well.
