

Artist Statement

I recently visited Museum of Modern Art in San Francisco, and I was very impressed by the modern artworks that I saw there. So, I wanted to create three modern sculptures for my first project. The first sculpture that I created is formed by three abstract swans that can symbolize a family or a group of friends . Swans are loyal animals and they usually mate for life, that is the reason that I chose them for my sculpture. As swans' characteristics, my sculpture represents the importance of loyalty between our families and friends.

My second sculpture is inspired by flowers. I like flowers, but I can't give enough care of them and they end up dying fast. So, I thought if I create a virtual flower, I can keep it as long as I want. With the blue color, I wanted to create glass effect . The reason is that they are fragile and they need to be taken care of well.

As I represent the gifts of the life with two of my sculptures, I also wanted to point out the complexity of it with my last sculpture that is created by bunch of rings.
